June-July 2006 DX Reports

June and July have been very active months for 6m. The DX continues! --Far East to Mid-USA, Europe to west coast USA, and Far East to Europe, and on multiple days yet.

The bulletin is up to 10 pages again, and the non-contributory listings, mostly from the OH2AQ reflector, just cover the period June 19 through July 13. I've just sifted through over 4800 OH2AQ reports of paths over 4400km. There were 3177 reports of reception between 2200-4400km. Most of these were not used, and this has led to lack of coverage in some countries and call areas.

Listings obtained from the OH2AQ reflector include distances in kilometers. These are determined preferentially from the grids in the post, and otherwise from one or both of the prefixes of the calls. Note that the latter determination results in VERY rough approximations to the distances, especially for large countries and call areas.

Reports from regular contributors who usually submit their reports just after the first of the month (June) are being published now. Their July reports will be published the middle of August. Regular contributors featured this month are JA1VOK, W5UWB, K6QXY, G4UPS, VE7SKA, and YO7VS. Apologies to any sources I may have inadvertently neglected.

The first entry is *mmddhhii*, where *mm* is the month, *dd* is the day of the month, *hh* is the hour UTC, and *ii* is the minutes after the hour. The year is 2006. Symbols just before the call of the reporting station include: V=Video Carrier, I=Inband video sidebands, F=FM audio, B=beacon, C=CW, D=Telemetry Data, J=Digital, typically JT6M or JT65A for EME, R=RTTY, S=SSB, W=mode not mentioned (or both CW & SSB), H=heard only. BSc = backscatter.
